

IF YOUR CHILD GOES MISSING

- **DO NOT WAIT!**
- **Search the immediate area.**
- **Call 911 immediately!**
- **Have this kit available for investigators.**
- **Call the Missing Child Center—Hawaii.**

How to Use This Kit:

1. Clearly print your child's full name and the date completed on the front cover. Due to changes in physical characteristics throughout your child's growth, we recommend updating kits annually.
2. Attach a recent photograph of your child, preferably a front shot of his or her head and shoulders.
3. Attach strands of your child's hair as a DNA sample.
4. Enter all applicable identification into the spaces provided.
5. Fingerprint your child using the attached ink strip. (See fingerprinting instructions above fingerprint boxes.)
6. Allow ink to dry, taking caution not to smear.
7. Dental chart should be completed by your child's dentist at your next visit.
8. Store in a safe, accessible place for your records only.
9. Talk with your child about safety often. Make sure he or she knows his or her complete name, address and phone number including area code.

This Keiki ID Kit was made possible by

Supporting Hawaii's
Law Enforcement
Since 1984

The Missing Child Center—Hawaii (MCCH), a program of the Department of the Attorney General, operates as a state resource center for missing children and their families. MCCH works with all county police departments in Hawaii, the Federal Bureau of Investigation (FBI), mainland law enforcement agencies, nationwide missing child clearinghouses and the National Center for Missing & Exploited Children (NCMEC) in the recovery and reunification of missing children with their families.

DNA HAIR SAMPLE*

Comb your child's hair and keep 5-10 strands that come out naturally. Place the strands **with root attached** in a tightly sealed plastic zip-lock bag and tape below.

Tape plastic bag here.

FINGERPRINT RECORD*

Lightly press your child's fingers individually on an inkpad and then press each lightly on the respective blank below.
