## Maps of Waipahu

The following set of maps and tables focus on the area known as Waipahu. Waipahu is a community located near Pearl Harbor on Oahu, in the jurisdiction of the City and County of Honolulu. There are 35 neighborhood board districts on Oahu, of which Waipahu is one. All of the maps in this section are dot density maps that show the spatial distribution of offense locations. The shapes and colors of the dots have been varied to show different offense and arrestee characteristics. The base maps also vary, showing topography, land use, or demographic features of the landscape.

The Waipahu neighborhood board district maps are organized into two sets. The first set plots offenses that took place in Waipahu for which Waipahu residents and non-residents alike were arrested, juxtaposed over different types of base maps. The second set plots the characteristics of offenses and arrestees among youth who reside in Waipahu. In other words, the first set contains points selected by offense location within the catchment area, that is, those offenses that took place within the Waipahu neighborhood board district, regardless of whether or not the arrestee was a Waipahu resident. In contrast, the second set contains points selected by geographic residence of arrestee, that is, those offenses for which a juvenile living in Waipahu was arrested. Making the distinction between the spatial distribution of offenses by Waipahu residents and nonWaipahu juveniles is often helpful to those planning youth development and intervention activities.

In 2001, there were 354 Waipahu residents who were arrested for 616 juvenile offenses. A small percentage was arrested multiple times, raising the average number of offenses per arrestee to 1.74. Waipahu juveniles had a slightly higher per capita number of juvenile arrestees than Oahu overall, with 21 Waipahu juvenile arrestees for every 1,000 Waipahu juveniles under the age of 18, as compared to 19 Oahu juvenile arrestees for every 1,000 juveniles on the island of Oahu. The per capita number of young female arrestees in Waipahu was equal to the per capita number of young female arrestees on Oahu (17 per 1,000 female juveniles). Males in Waipahu had a slightly higher per capita number of arrestees ( 24 per 1,000 male juveniles) as compared to male youth overall on Oahu ( 22 per 1,000 male juveniles). The table below compares the number of arrestees per capita for Waipahu and Oahu.

Table 10:
Juvenile offenders per capita in Waipahu and Oahu by gender

U.S. Census Bureau, Census 2000 Summary File 2

## Offense locations comparing Waipahu and non-Waipahu juveniles

This first set of maps shows the offense characteristics of Waipahu juveniles arrested for islandwide offenses as compared to non-Waipahu juveniles arrested for offenses in Waipahu, by type of offense. While there were 616 offenses for which Waipahu juveniles were arrested island-wide, 399 of these occurred within Waipahu. Within Waipahu, there were a total of 497 offenses, including 98 offenses for which non-Waipahu juveniles were arrested. The first two maps, both entitled Offense Locations for Waipahu Juveniles and Non-Waipahu Juveniles, show the offense locations at the Waipahu and island scales, respectively. The island-wide map uses solid and hollow dots to differentiate offenses by Waipahu and non-Waipahu juveniles. All of the maps at the Waipahu scale use unique symbols to differentiate the type of offense for which an arrest was made. These maps use a topographical image as the base map.

The following three maps use the same dot density crime theme featuring crime type juxtaposed on different base maps. The map entitled Offense Locations for Waipahu Juveniles and NonWaipahu Juveniles by Offense Type over Land Uses overlays the location of offenses by crime type (excluding status offenses) on a land use map maintained by the City and County of Honolulu. As one can observe, many of the non status offenses occurred along the commercial corridor of Farrington Highway. Offense Locations for Waipahu Juveniles and Non-Waipahu Juveniles by Offense Type over Poverty juxtaposes offense locations over shaded areas indicating different rates of poverty according to the 2000 U.S. Census. The darker the shade, the greater is the percentage of those living below the federally stated poverty level. Many other socioeconomic and demographic measures from the Census can be used as base maps. For example, the Offense Locations for Waipahu Juveniles and Non-Waipahu Juveniles by Offense Type (including status offense) over Ethnic Concentration map uses demographic information to show the concentration of those who identified themselves as full or part Asian in the 2000 Census. The darker the shade, the greater is the percentage of Asians living in those areas. Since status offenses accounted for over 60 percent of all offenses in Waipahu, an additional map was created excluding all status offenses, entitled Offense Locations for Waipahu Juveniles and Non-Waipahu Juveniles by Offense Type (excluding status offenses) over Ethnic Concentration. In this map, the shaded areas indicate varying proportions of those who identified themselves as Hawaiian or Pacific Islander.

## Offense locations for Waipahu juveniles

This second set of dot density maps plots the distribution of juvenile offenses for which a Waipahu resident was arrested. Map themes describe various offense and arrestee characteristics. The two maps entitled Offense Locations for Waipahu Juveniles by Age use color-coded dots to display the age of the arrestee and the offense location. The first of these shows the entire island of Oahu, while the second zooms to Waipahu. Over half ( 54 percent) of the arrests were for status offenses.

Below the Waipahu scale map is a similar map that uses different icons to show the primary ethnicity of the arrestee for that offense, using the first of five ethnicity fields. This map is titled Offense Locations for Waipahu Juveniles by Primary Ethnicity. There are many variations of ethnicity maps that can be created depending upon the purpose of the inquiry. For example, to view the crime characteristics for a specific ethnic group, one could map the location and types of offenses for arrestees identified only with that particular group.

An example of a more specific map showing the distribution of offense types among a select population is the map of offenses by gender. The map entitled Offense Locations for Waipahu Juveniles by Gender shows island-wide offense locations with points color-coded to distinguish males and females. Two maps were created at the Waipahu scale for males and females, respectively, entitled Offense Locations for Waipahu Male Juveniles by Offense Type and Offense Locations for Waipahu Female Juveniles by Offense Type. By isolating male and female arrests on separate maps, one can more clearly view the pattern of offense types.

As previously mentioned, 332 of the 616 offenses (54 percent) among Waipahu juveniles were status offenses. And of the 332 status offenses, 254 offenses ( 77 percent) were runaways. In fact, runaways accounted for 41 percent of all offenses among Waipahu juveniles. Given this high proportion, several maps were made highlighting runaway offenses. The first, entitled Runaway Offense Locations for Waipahu Juveniles, shows the location of Waipahu runaway offenses across the island. Among runaways, 204 juveniles (80 percent) remained in Waipahu, while 50 (20 percent) were arrested outside of Waipahu. The second map, entitled Approximate Locations of Waipahu Juvenile Runaway Offender's Residence and Offense Locations, compares the residential locations and offense locations among runaway juveniles. In the case of runaway offenses, the offense location is also the arrest location. This map uses a solid dot to indicate the approximate locations of offenders' residences and a hollow dot to indicate the offense locations. Increases in the diameter of the hollow dots indicate increases in the number of offenses at that location. It is possible that more than one youth in a household may have been arrested for a runaway offense at a particular location. In an interactive mode, one can highlight and select clusters of dots and display the information about those points contained in the selected records for further examination.

Truancies were not as frequent as runaways and accounted for 53 of the 332 status offenses (16 percent). Of the 53 truancies for which a Waipahu resident was arrested, 39 arrests were made within Waipahu. These are shown on the map entitled Truancy Offense Locations for Waipahu Juveniles. Buffers were drawn around the public schools in Waipahu and were used to generate summary counts of offenses within .25 and .5 mile radii around each campus. These counts are shown in Table 11. Further analysis could be conducted on those offenses occurring within close proximity of schools.

Maps were also created to show the location of offenses for which Waipahu juveniles were arrested more than once in 2001. Offense Locations for Repeat Offenders Living in Waipahu shows an island-wide view of these offenses with symbols indicating the various offense types. The following map of the same title zooms to Waipahu. There is often interest in the location of drug offenses among youth in a community and the proximity of these offenses to schools. These are shown on the map entitled Drug Offense Locations for Waipahu Juveniles. The diameter of the dots varies to indicate the number of offenses at one location; the hollow and solid dots indicate the type of drug offenses, that is, petty misdemeanor or felony offenses, respectively.

The final map plots the location of juvenile-related resources in Waipahu. The map includes over 75 agencies and community organizations. They are grouped by resource type and are indicated on the map by unique symbols and text labels. Maps such as these are extremely useful in developing collaborative solutions that draw upon local knowledge and collective resources.

Finally, tables were created that summarize the numeric values represented in the thematic maps. This final section includes the following tables:

- Table 11: Offenses inside and outside of Waipahu for Waipahu juveniles and non-Waipahu juveniles
- Table 12: Offenses inside and outside of Waipahu for Waipahu juveniles and non-Waipahu juveniles by gender
- Table 13: Offenses for Waipahu juveniles by type and age
- Table 14: Waipahu juvenile arrestees by age
- Table 15: Waipahu juvenile arrestees by primary ethnicity
- Table 16: Offenses for Waipahu juveniles by type and primary ethnicity
- Table 17: Offenses for Waipahu juveniles by type and gender
- Table 18: Waipahu juvenile arrestees by gender
- Table 19: Status offenses inside and outside of Waipahu for Waipahu juveniles and nonWaipahu juveniles
- Table 20: Status offenses for Waipahu juveniles by age
- Table 21: Status offenses for Waipahu juveniles by gender
- Table 22: Status offenses for Waipahu juveniles by primary ethnicity
- Table 23: Truancy offenses for Waipahu juveniles within .25 and .5 mile of public schools
- Table 24: Repeat offenses inside and outside of Waipahu for Waipahu juveniles and nonWaipahu juveniles
- Table 25: Repeat offenses for Waipahu juveniles by age
- Table 26: Waipahu juvenile repeat offender arrestees by age
- Table 27: Repeat offenses for Waipahu juveniles by gender
- Table 28: Repeat offenses for Waipahu juveniles by primary ethnicity
- Table 29: Drug offenses for Waipahu juveniles by age
- Table 30: Drug offenses inside and outside of Waipahu for Waipahu juveniles and nonWaipahu juveniles
- Table 31: Drug offenses for Waipahu juveniles by gender
- Table 32: Drug offenses for Waipahu juveniles by primary ethnicity

## Selected Maps and Tables

The following selected maps of Waipahu correspond to the previous narrative. There are many more maps that can be created with the available data. This set of maps highlights some of the possible combinations of themes along with the range of map types using data from the JJIS. Tables provide the quantitative data represented in the maps.

## Offense Locations for Waipahu Juveniles and Non-Waipahu Juveniles

Offense Locations for Waipahu Juveniles and Non-Waipahu Juveniles by Offense Type (excluding status offenses) over Land Uses

Offense Locations for Waipahu Juveniles and Non-Waipahu Juveniles by Offense Type over Poverty

Offense Locations for Waipahu Juveniles and Non-Waipahu Juveniles by Offense Type (excluding status offenses) over Ethnic Concentration

## Offense Locations for Waipahu Juveniles by Age

## Offense Locations for Waipahu Juveniles by Primary Ethnicity

## Offense Locations for Waipahu Juveniles by Gender

## Runaway Offense Locations for Waipahu Juveniles

## Offense Locations for Repeat Offenders Residing in Waipahu
