## Caveats

Statistical crime reporting requires a number of rules to count events consistently. Multiple offenses may be committed in most opportunities for crime, and multiple charges may be attached to a single arrest. The statistics presented in this report were collected and compiled using the FBI's Hierarchy Rule that limits crime counts to only the most serious offense committed within an incident that is constrained by time and place, and limits arrest counts to only the most serious charge per booking. Therefore, some crimes may be underreported, e.g., if the victim is killed in a single-victim robbery situation, only murder is recorded, not the crime of robbery. Further details of the Hierarchy Rule are discussed in Footnote 1 on page 2.

The number of reported offenses corresponds to a victim count for only some types of offenses. Violent crimes generally employ the total victim count. Robberies, however, are counted by the incident, regardless of the number of victims. Property crimes also are generally counted by the incident, with the notable exceptions that a burglary is counted for each structure entered, and a motor vehicle theft for each vehicle stolen.

Some crimes are inherently difficult to classify. The Uniform Crime Reporting (UCR) definition of aggravated assault, for example, is complex and has been misinterpreted, resulting in large variations between agencies and between years.

These statistics were produced from the operations of Hawaii's four county police departments. Statistics of prosecutorial, court, and parole board decisions are reported separately, by those agencies.

It is strongly cautioned that year-to-year changes based on small numbers of events are likely to result in large percentage changes which typically are not as meaningful as they might appear at first glance.

An unappreciated difference in the time period covered by two different sets of statistics can lead to erroneous conclusions regarding underlying relationships. For example, an abrupt change in the "percent of offenses cleared" statistics, which link the volume of arrests to the volume of reported offenses, should be viewed with caution because offenses already reported in previous years may be counted as cleared, by arrest or exceptional means, in the current year. A clearance is further defined in Appendix A.

The distinction between resident and de facto population is a most important consideration in viewing *Crime in Hawaii*. Crime rates are based on the number of crimes per 100,000 residents. De facto population includes the number of persons physically present in the state: residents, tourists, and non-resident military personnel. Crime rates based on de facto population can be significantly different than rates based on resident population. The UCR program uses resident population to calculate crime rates for all states. However, because of Hawaii's relatively small resident population and large visitor population, crime rates based on resident population are much higher when compared to rates based on the actual number of people in the state.

These and other issues surrounding the collection and compilation of crime and arrest data can contribute to the misinterpretation of statistics presented in this report. We welcome the opportunity to address the validity of readers' interpretations involving these crime statistics. Please feel free to contact us:

*\*Including the violent Index Crimes of murder, rape, aggravated assault, robbery, and tracked separately, human trafficking–commercial sex acts and human trafficking–involuntary servitude; the property Index Crimes of burglary, motor vehicle theft, and larceny-theft; and tracked separately, arson.*

- In 2021, Maui County’s total Index crime, violent crime, and property crime rates increased by 6.0%, 21.4%, and 4.3%, respectively. The robbery and burglary rates decreased by 45.5% and 16.4%, respectively, to reach their record low levels.
- In 2021, Kauai County’s total Index crime, property crime, murder, and larceny-theft rates decreased by 6.3%, 9.0%, 100.0%, and 16.1%, respectively, to reach their record low levels. The arson rate increased by 339.3%, to reach its record high level. The violent crime rate increased by 8.7%.
- Twenty-seven murders were reported statewide in 2021, as compared to 39 reported in 2020. Males comprised 83.3% of the alleged murder offenders and 60.0% of the victims. Including unknown data, approximately 58.4% of the murder victims did not know the offenders. Firearms were used in 51.9% of the murders.
- Of the 3,135 murders, robberies, and aggravated assaults reported statewide in 2021, 33.2% were committed using strongarm weapons; 31.3% with “other” or unknown weapons; 20.6% with knives or other edged weapons; and 15.0% with firearms.
- In 2021, approximately \$99.9 million in property value was reported stolen in the State of Hawaii, an increase of 31.1% from the figure reported in 2020. Of the total value stolen in 2021, 33.1% was recovered, marking an increase from the 27.5% that was recovered in 2020.
- In 2021, no police officers were killed in the line of duty in the State of Hawaii, and 391 police officers were assaulted, yielding a rate of 13.5 assaults per 100 officers. *Crime in Hawaii, 2021* also provides data on the time of day, type of assignment, and the weapons used in assaults against police officers.
- On October 31, 2021, a total of 2,828 police officers and 809 civilians were employed by the four county police departments, denoting a 2.3% decrease in workforce from the figures reported from October 31, 2020.

The table on the following page provides comparative state and county crime rate data by offense, offense category, and percent change from 2020.

*Data submitted by Hawaii’s four county police departments for 2021 were converted to the traditional Summary Reporting System (SRS) format from data processed under the National Incident-Based Reporting System (NIBRS), a new, more comprehensive system. The absence of the hierarchy rule and other nuances in NIBRS may account for slight differences in the number of reported offenses and other tallies reported under the native SRS specifications. For more information on the differences between SRS and NIBRS, see <https://ucr.fbi.gov/nibrs-overview>.*

# THE UNIFORM CRIME REPORTING PROGRAM

## BACKGROUND

The Uniform Crime Reporting (UCR) Program was initiated in 1930 by the International Association of Chiefs of Police (IACP) to meet a recognized need for a nationwide system to collect crime statistics. Since there are numerous differences in criminal codes throughout the United States, the UCR program uses a standard definition for each offense. Law enforcement agencies submit data in accordance to these definitions rather than state statutes. This standardization allows for inter-jurisdictional comparisons and internal validity of national totals.

The national UCR program is administered by the Federal Bureau of Investigation (FBI). Definitions of specific offenses, as well as reporting criteria, are contained in the FBI's *Summary Reporting System (SRS) User Manual*. The FBI provides report forms and training to city, county, and state law enforcement agencies. Crime data are collected by over 18,000 local enforcement agencies and reported to the FBI. The FBI assembles, publishes, and distributes a comprehensive annual publication entitled *Crime in the United States*, as well as periodic special reports.

In an effort to streamline procedures and provide consistency and comparability of data, the FBI promoted the development of state UCR programs. The purpose of the state-level UCR program is to collect data from local law enforcement agencies and assure compliance with standards developed jointly by the FBI and IACP.

Hawaii's UCR program was housed in the Judiciary from its inception in 1975 until 1981, when it was transferred to the Hawaii Criminal Justice Data Center, a Division of the Department of the Attorney General. In 1991, the program was transferred from the Data Center to the Research and Statistics Branch of the Crime Prevention Division, which in 1995 became the Crime Prevention and Justice Assistance Division.

The Research and Statistics Branch collects and reviews the UCR reports received from the four county police departments before forwarding the reports to the FBI. The Branch is also responsible for providing technical assistance to the contributing agencies, as well as serving as the FBI's single point of contact in the State of Hawaii.

## CRIME STATISTICS

Consistent with the UCR objectives of providing the best representation of total crime and providing the most meaningful data to police departments, the UCR program collects data on reported offenses and arrests. It is widely understood that offenses known to police are an under-representation of the total number of crimes committed, and that a truly reliable measure of unreported crimes is difficult, if not impossible, to obtain. However, the use of reported offenses as official statistics can be verified and compared over time and between jurisdictions.

Because of their seriousness and frequency of occurrence, seven offenses were initially chosen by the IACP to comprise a Crime Index and serve as indicators of our nation's crime experience: murder and non-negligent manslaughter; rape; robbery; aggravated assault; burglary; larceny-theft; and motor vehicle theft. In 1979, a congressional mandate added arson

as the eighth Crime Index Offense.<sup>1</sup> In 2013, a reauthorization act mandated the FBI to add two human trafficking offenses, commercial sex act and involuntary servitude, as Part I offenses, totaling ten Crime Index offenses.

Information reported for Index Offenses includes: the number of crimes reported; the number of offenses cleared by arrest or by exceptional means;<sup>2</sup> the number of arrests, and the value of property destroyed by arson and taken in each of the remaining offenses, except aggravated assault. (By definition, property cannot be taken in an assault. An offense that begins as an assault but ends with property being taken is classified as robbery.) The ten Index Crimes plus the crime of negligent manslaughter are referred to as Part I Offenses. While complete information is collected on non-traffic related negligent manslaughters, this offense is rare and not mentioned in *Crime in the United States*. Part II Offenses include all other offenses, except traffic, not included in Part I. The national UCR program collects and reports only arrest data for Part II Offenses, while *Crime in Hawaii* additionally contains reported Part II Offense statistics.<sup>3</sup> Total negligent manslaughter arrests, including traffic-related, are included in *Crime in Hawaii* with the Part II arrests.

Definitions of terms used in this report appear in Appendices A and B. More detailed descriptions of the UCR program can be obtained from the *Summary Reporting System (SRS) User Manual* published by the FBI. Trends in law enforcement officers killed and assaulted (LEOKA) are reported in Appendix C, and population estimates are noted in Appendix D. New data for cargo theft, effective 2014, are reported in Appendix E.

UCR program rules for classifying and counting crimes are somewhat complex and can, at times, even appear contradictory. Prior to delving into the pages that follow, first-time readers of *Crime in Hawaii* are encouraged to read the “Caveats” page. All readers are requested to review this page when attempting to answer questions about how crimes and arrests are counted and to contact us if their questions remain unanswered. Contact information is at the bottom of the “Caveats” page.

## RECENT REVISIONS

In 2013, in addition to removing the word “forcible,” the FBI also approved revisions to the UCR Program’s definition of rape.<sup>4</sup> The revised definition of rape is, “The penetration, no matter how slight, of the vagina or anus with any body part or object, or oral penetration by a

---

<sup>1</sup> Hawaii has collected arson offense data since 1980. The Hierarchy Rule does not apply to arson offenses. This means that all arsons which become known to the police are counted, so that crime incidents which include arson and one or more of the other Index Offenses are counted twice. As a result, the FBI does not include arsons in calculating and reporting total Index Crimes or property crimes and their respective crime rates. In order to remain consistent with federal reporting, Hawaii also does not include arsons in total Index Crimes and property crimes. Arson offenses are also not counted in the grand total of Index & Part II Offenses.

<sup>2</sup> An offense cleared by exceptional means is one in which the offender and his or her exact location are known to the law enforcement agency but, for reasons beyond the control of the agency, the offender cannot be arrested. See Appendix A for definition and examples.

<sup>3</sup> See Appendix B for definitions of Part II offenses.

<sup>4</sup> The State of Hawaii will continue to track rape data under the old, or legacy, definition until comparative trends have been established. This will only apply to offense data and not arrests.

sex organ of another person, without the consent of the victim.” This revised definition encompasses all genders as victims of rape and also includes the offenses of sodomy, and sexual assaults with an object, which were previously reported to the FBI only as arrests in the “other sex offenses” category. The old definition, which will be referred to as the legacy definition throughout this report, is defined as, “The carnal knowledge of a female forcibly and against her will.” The State of Hawaii commenced the collection of rape data per the revised definition on January 1, 2014.

Other than the addition of arson in 1979, the UCR program has been a stable and static source of crime statistics for the U.S., allowing for crime rate comparisons between police departments and states across the nation. The FBI recently directed the participating agencies to additionally report the following offenses and arrests to its UCR program:

In 2010, in response to the *USA Patriot Improvement and Re-authorization Act of 2005*, which required the Attorney General to report cargo theft as a separate category in the FBI’s UCR system, the FBI added the offense of cargo theft. Due to the low numbers of participating agencies reporting cargo theft to the FBI, the FBI has yet to publish a cargo theft report. The State of Hawaii required participating law enforcement agencies to commence the collection of cargo theft data in January 2014; these data are reported in Appendix E.

In 2013, in order to comply with the *William Wilberforce Trafficking Victims Protection Reauthorization Act of 2008*, the FBI added two more offenses to its Part I Crime Index track: “Human Trafficking–Commercial Sex Acts” and “Human Trafficking–Involuntary Servitude”. The Act also required the FBI to distinguish between assisting or promoting prostitution, purchasing prostitution, and prostitution, all of which are reported only as Part II arrests. The State of Hawaii initiated the human trafficking data collection in January 2014. In contrast to the FBI’s *Crime in the U.S.* report, which reports human trafficking data separately, the *Crime in Hawaii* report documents human trafficking offenses<sup>5</sup> and arrests as Part I violent Index Crimes, as specified in the FBI’s *SRS User Manual*. Prostitution arrests are aggregated under the prostitution category, in line with the national report.

Lastly, the FBI revised the race categories in 2013 in accordance with a directive from the U.S. Government’s Office of Management and Budget. The “Asian/Pacific Islander” race category was separated into “Asian” and “Native Hawaiian or Other Pacific Islander” categories, which also necessitated the State of Hawaii to add “Other Asian” and “Other Pacific Islander” subcategories to its expanded list of Asian and Pacific Islander subcategories.

## NATIONAL INCIDENT-BASED REPORTING SYSTEM

The FBI announced the discontinuation of the SRS version of the nationwide UCR Program, effective January 1, 2021. Only the National Incident-Based Reporting System (NIBRS) version will continue thereafter (see <https://ucr.fbi.gov/nibrs-overview>). The Hawaii UCR Program’s NIBRS data repository received NIBRS certification from the FBI in February 2019. For more information on the effects of NIBRS on crime statistics, please visit [https://ucr.fbi.gov/nibrs/2014/resource-pages/effects\\_of\\_nibrs\\_on\\_crime\\_statistics\\_final.pdf](https://ucr.fbi.gov/nibrs/2014/resource-pages/effects_of_nibrs_on_crime_statistics_final.pdf).

<sup>5</sup> As in the case for arson, the Hierarchy Rule does not apply to human trafficking offenses, thus all instances of human trafficking are reported. Human trafficking offenses are not included in the total Index Crime count, violent Index Crime, or the grand total of Index & Part II Offenses.

In 2021, the total number of Index Crimes reported in the State of Hawaii increased 10.0%; violent crimes increased 5.7%, and property crimes increased 10.5%. The number of reported crimes decreased for three Index Crime categories: murder, 30.8%; arson, 12.2%; and human trafficking-commercial sex acts, 55.6%. The number of reported crimes increased for six Index Crime categories: rape, 22.1%; robbery, 3.6%; aggravated assault, 2.7%; burglary, 2.4%; larceny-theft, 9.6%; and motor vehicle theft, 22.0%. Two human trafficking-involuntary servitude offenses were reported in 2021, as compared to none in 2020.

During the past 10 years, the population of the State of Hawaii increased 3.4%, and the total number of reported Index Crimes decreased 11.6%, violent crimes increased 14.0%, and property crimes decreased 13.6%.

The table on the following page lists the numbers of reported offenses, excluding traffic, in the State of Hawaii from 2012 to 2021.

*Data submitted by Hawaii's four county police departments for 2021 were converted to the traditional Summary Reporting System (SRS) format from data processed under the National Incident-Based Reporting System (NIBRS), a new, more comprehensive system. The absence of the hierarchy rule and other nuances in NIBRS may account for slight differences in the number of reported offenses and other tallies reported under the native SRS specifications. For more information on the differences between SRS and NIBRS, see <https://ucr.fbi.gov/nibrs-overview>.*

## ARREST STATISTICS

Arrest data, including the age, sex, and race/ethnicity of the arrestees, are reported by county law enforcement agencies for all violations except most traffic offenses<sup>1</sup>. The UCR Program requires that an arrest be counted on each separate occasion a person is taken into custody, notified, or cited. As such, arrest figures do not measure the number of individual people arrested, since one person may be arrested several times during the year, for the same or different types of offenses.

Only the most serious offense is recorded for each arrest. The offenses are divided into two categories: Index Offenses, including murder, rape, robbery, aggravated assault, burglary, larceny-theft, motor vehicle theft, arson, and the two human trafficking offenses: commercial sex acts and involuntary servitude; and Part II Offenses, comprised of all other offenses, including manslaughter by negligence<sup>2</sup>. Definitions of Index Offenses and Part II Offenses are included in Appendices A and B, respectively.

In 2013, the FBI separated its “Asian or Pacific Islander” race category into two distinct groups: “Asian” and “Native Hawaiian or Other Pacific Islander”. Categories typically employed by the FBI and elsewhere in the nation are restrictive to the following: White, Black, American Indian or Alaskan Native, Asian, and Native Hawaiian or Other Pacific Islander. In this report, race and ethnicity data are presented using additional categories relevant to Hawaii: White, Black, American Indian or Alaskan Native (“Indian” in the tables), Chinese, Japanese, Filipino, Korean, Other Asian, Hawaiian, Samoan, and Other Pacific Islander.

The status offenses of truancy and ungovernability are included in the Part II arrest category of “All Other Offenses” for juveniles. The role that these status offenses play in any examination of juvenile arrest trends should be seriously considered. For example, in 2007, there were 5,214 arrests statewide for the specified status offenses, accounting for 46.4% of juvenile arrests for Part II Offenses, and 38.8% of all juvenile arrests. Thus, status offense arrests weigh heavily into the calculation of juvenile arrest totals and trends, and any adult-to-juvenile comparison based on traditional Part II totals will be biased in favor of adults.

---

<sup>1</sup> Contrary to the UCR rule in which reported offenses of negligent manslaughter are tallied for non-traffic cases only, arrest totals for this offense include both traffic and non-traffic cases.

<sup>2</sup> The division of crime categories is sometimes still made between Part I, an older term that encompassed Index Offenses plus manslaughter by negligence, and Part II, which includes all other offenses. The sections herein on reported offenses (pages 5-99) and arrests (pages 101-171) include manslaughter by negligence with the Part II Offenses for two reasons: 1) the current emphasis of the UCR Program, and this report, is on Index Offenses (which exclude manslaughter by negligence) rather than Part I Offenses; and 2) the FBI’s national report, *Crime in the United States*, groups arrest data by Index Offenses and all other offenses — arrests for manslaughter by negligence are excluded.

Two types of human trafficking offenses, commercial sex acts and involuntary servitude, were added to this report in 2014. The arrest counts for these categories are reported with the violent crime sections throughout this report. Prostitution, a Part II offense, was broken down into three categories: prostitution, assisting or promoting prostitution, and purchasing prostitution. In line with the FBI's *Crime in the U.S.* report, arrests for these three categories are combined and reported as "Prostitution."

#### **AN IMPORTANT NOTE ABOUT ARREST DATA FOR RAPE**

The State of Hawaii began collecting data per the FBI's revised definition of rape in 2014 (see page 3 for more information). A distinction between rape cases collected under the revised and the legacy definition is only noted for data on reported offenses. The rape category for arrest data accounts for all rape arrests regardless of which definition is applied.

#### **NATIONAL INCIDENT-BASED REPORTING SYSTEM**

Although the "unknown" race category is an acceptable entry in NIBRS, the FBI's *Crime in the US* report does not convert this category for summary-based data. For Hawaii's UCR Program, the "unknown" race code has been added as an acceptable field for NIBRS-certified agencies only.

## APPENDIX A

### DEFINITIONS

**AGGRAVATED ASSAULT:** An unlawful attack by one person upon another for the purpose of inflicting severe or aggravated bodily injury; attempted murder. This type of assault usually is accompanied by the use of a weapon or by means likely to produce death or great bodily harm. It is not necessary that injury result from an aggravated assault when a gun, knife, or other weapon is used which could and probably would result in serious personal injury if the crime were successfully completed. Attacks by personal weapons, such as hands, fists, feet, etc., which result in serious or aggravated injury.

Examples of offenses cleared by exceptional means include suicide of the offender, double murder, deathbed confession, and denied extradition. It should be noted that the number of offenses and not the number of persons arrested is used to count clearances. Several offenses may be cleared by the arrest of one person; or the arrest of several people may clear only one offense.

**CRIME INDEX:** The ten Part I Offenses reported in the Uniform Crime Reporting Program to represent the status of crime in the United States: murder and non-negligent manslaughter (the latter term is not used in Hawaii), rape, robbery, aggravated assault, burglary, larceny-theft, motor vehicle theft, arson, human trafficking: commercial sex acts, and human trafficking: involuntary servitude.

More accurate crime rates (e.g., the number of rapes per 100,000 females or the number of motor vehicle thefts per 100,000 vehicles) are not reported in *Crime in the U.S.* and, therefore, are not used in *Crime in Hawaii*.

## APPENDIX E

### POPULATION ESTIMATES

State and county resident population estimates for *Crime in Hawaii 2021* are from the U.S. Census Bureau.

The United States census of population is taken as of April 1 in each year ending in zero. Intercensal population estimates are made as of July 1 in each non-census year. Estimates based on the just-completed census are also made for July 1 of census years. While the FBI continues to use exact census populations to calculate crime rates in census years, the *Crime in Hawaii* reports use July 1 estimated populations to determine crime rates for all years. In so doing, a regular progression of estimates taken at 12-month intervals is available to more accurately reflect crime rate trends.
