

00:33:31 Carrie Ann Shirota: The most humane and effective way to protect the health and safety of correctional officers and the people who are incarcerated is to significantly reduce the incarcerated population. Staff shortages have been a long term issue, and building a new and larger jail is not the solution.

00:34:00 Kylie Akiona: Eō!!

00:38:00 Angie McFarland: what is being done to move those that are in line for work furlough but just sitting? mental health crisis fir these men is a HUGE concern!

00:53:27 Tony: Is there an upcoming list of solutions that'll be worked on soon, regarding current concerns and issues happening now

00:54:20 Carrie Ann Shirota: If we pass meaningful bail reform, we could reduce the OCCC population by 30-40%!

00:56:01 Tony: Does the Governor have a time limit to respond with his answer of who will be selected?

00:56:12 theodore sakai: no

00:56:35 Senate Minority Research Office-Joyce: Senator Fevella's office will be sharing his powerpoint.

00:56:42 Tony: Yes "slow-walking" is a good description...

01:00:38 Carrie Ann Shirota: PSD has a contract with Core Civic. They should have access to all health care information, including staff at Saguaro.

01:01:17 Tony: Yes, PSD does have access to all health care information

01:01:19 Martha.t.torney@gmail.com: I agree 100%

01:01:30 Tony: I agree 100% too

01:03:27 kat brady: CoreCivic are CONTRATORS, NOT PARTNERS. HI needs to hold them accountable.

01:05:14 Daniel Mistak: I second that. The State is absolutely responsible for conditions of confinement, and there is no way that you can contract away that. A recent VT case reaffirmed that. Why do we invite litigation by not meeting our constitutional requirements?

01:09:36 Carrie Ann Shirota: It's difficult to recruit people to work in an environment where they - and those incarcerated are subjected to despair and violence. Sen. Fevalla noted assaults and rapes, gang violence, and a lack of health care. Exposure to this environment impacts staff and the families that they return home to every day. All the more reason to invest in community based solutions.

01:10:13 Angie McFarland: kat - Ill be corresponding with you on how I can get more involved. the more I learn the angrier I get!

01:20:03 Angie McFarland: there seems to be NO plan to decrease population starting with those on community status!!!! let them go home with monitors!

01:22:20 kat brady: Sadly the state's solution is to have corporate profiteers (P3s) build, despite their reputation for shoddy construction. Look at who should be in jail before you get to bricks and mortar! The NY AIA passed a resolution saying that their members should NOT be designing places that cause harm. ENGAGE THE COMMUNITY NOW!

01:27:05 Angie McFarland: releasung them could happen TODAY! get the list of community status inmates put a monitor on them and get them out!

01:28:23 kat brady: After HI leases the beds after 25 or 30 years the P3 demands a large balloon payment and then HI gets a facility that has not been maintained. WHO IS PROFITTING FROM THIS DISASTER?

01:31:57 Carrie Ann Shirota: We need to utilize all tools available to reduce the population - from diversion, to early and compassionate release, furloughs, etc. Private prison corporations are accountable to their shareholders, not the people of Hawai'i.

01:34:10 Daniel Mistak: Bob is 100% correct.

01:35:02 Carrie Ann Shirota: Judge Ibarra is right! Thank you, Bob, for your presentation.

01:38:29 Carrie Ann Shirota: Support Bail reform and a MORATORIUM!

01:40:45 kat brady: YES INDEED!

01:42:25 kat brady: Alternatives to Incarceration have been in statute for decades while the legislature has increasingly passed more and more punitive laws. HI needs legislators with the courage to speak the truth!

01:42:33 Carrie Ann Shirota: Yes, follow the systems approach of the youth system. Hawai'i has been successful with the vision, and commitment of the Juvenile Justice Working Group, Judge Browning and Mark Patterson and many others. Let's invest in what works.

01:43:21 kat brady: The Chair is right!

01:43:51 kat brady: Justice Reinvestment laid out what we need to do.

01:43:54 Tony: Great points Mr. Patterson

01:45:01 Daniel Mistak: You won't do anything without DHS and DOH help, and there is no cross communication at this point.

01:46:12 kat brady: Yes Dan. That is the problem with 'silo thinking" that HI does.

01:46:27 Daniel Mistak: Create a cross-system collaborative and coordinating council. Recommendations won't work without buy in.

01:47:58 Diana (she/her): Can we have access to Bob's report too?

01:54:01 Carrie Ann Shirota: A new moratorium bill will be introduced and it will be strengthened compared to the bill from last year. It will incorporate language to take a systems approach to the entire system to reduce the overall population.

02:05:16 kat brady: MAHALO MARTHA!

02:07:06 Carrie Ann Shirota: Thank you, Kat. Both bills are very important!

02:10:37 Carrie Ann Shirota: Would the Oversight Commission request a detailed list of funds spent to date on the planning of OCCC? Would PSD be willing to pause the process at the request of the Oversight Commission?

02:12:36 Carrie Ann Shirota: How much is PSD requesting?

02:15:20 Carrie Ann Shirota: In the interest of transparency, PSD should disclose to the Commission and the community, how much money they are requesting of the State Legislature for the RFQ and RFP?

02:16:59 Tony: Yes I totally agree Carrie Ann100%

02:17:15 Carrie Ann Shirota: Thank you, Martha!

02:17:43 Carrie Ann Shirota: We can do it for the adult system too!
