

00:18:52 Cassie Chee (she/her): Welcome Christin!

00:44:10 Robert Merce: who is involved from school of architecture

00:52:02 Diana B (she/her/hers): Is the person/people from the School of Architecture qualified to make decisions on correctional facility design?

00:53:06 Lee Curran she/her: Good question Diana!

00:57:16 Soon (she/her): Please look into diversion! Someone's bail was paid recently- he was released into a program. Incarceration set back this person's timeline to receive treatment. Additionally, his attorney is unable to contact him now and doesn't know which provider he was released to.

00:57:23 Carrie Ann Shirota: PSD and the Oversight Commission should weigh in on the Mayor, HPD and Prosecutor's orchestrated plan to increase the number of people propelled into OCCC. We should focus on diversion and community services, not increasing the pipeline to jail. The Judiciary is complicit. They have the ability to use unsecured bail but they have never used this tool to decrease the pretrial population.

00:59:23 Mike Town: Indeed!

01:04:56 Les Estrella, GHH: In 2015, Honolulu City Council, as did Hawaii County Council passed resolutions to become members of the National Stepping Up Initiative led by the National Association Of Counties. This initiative is to reduce the number of mentally ill in jail. Since then, they have collected data and best practices from across the country. <https://stepuptogether.org>

01:08:06 Diana B (she/her/hers): Great news about the recordings!

01:11:29 Christin M. Johnson (she/her): All, many thanks for the warm welcome. I am so thankful to be here and honored to serve the people of Hawaii. My email is christin.m.johnson@hawaii.gov. Please contact me any time!

01:17:13 Carrie Ann Shirota: If electricity went down and affected our jails and prisons in Hawaii, we would hear about it. Some folks inside Saguaro are reporting that there is no a/c. It's 100+ degrees in Saguaro. Thank you for looking into this matter.
